GENERAL SPARE PARTS CO. Ltd

Company Profile

Historical Foundation & Accreditation

Established in 1985, **General Spare Parts (GEPCO) Ltd** is a premier Lebanese firm that has served as an approved supplier to the Lebanese Ministry of Defense and the Ministry of Interior for four decades. By 1990, the company solidified its position as a key defense partner, earning pre-selection accreditation with all armed forces operating within Lebanese territory. Our strategic focus on public markets allows us to meet and exceed the rigorous quality and delivery requirements of the defense sector.

Global Infrastructure & Technical Reach

GEPCO operates out of a 250sqm headquarters in Central Beirut and a 500sqm specialized workshop located near the Beirut Port. This infrastructure enables our team of 15 highly skilled specialists to provide rapid on-board vessel service and technical support throughout the Middle East and Africa. To ensure secure international procurement and streamlined logistics, our UK-based sister company, **Drex Industries**, recently invested in a state-of-the-art office in London.

Specialized Expertise & Mission

Our mission is to support clients through high-level consulting, specialized equipment, and comprehensive product training. **GEPCO** has developed four core pillars of expertise:

- **Navy & Maritime:** Patrol boats, deep-diving equipment, maritime safety, and Vessel Traffic Services (VTS).
- **Law Enforcement & Protection:** Anti-riot materials and specialized security applications.
- **Surveillance & Detection:** Thermal imagers and advanced detection devices.
- **Emergency & Tactical:** Search & Rescue (S&R) systems, firefighting vehicles, and transmission devices.

We maintain operational readiness for our customers through a dedicated **24/7 emergency service**.

Quality Assurance & Environmental Policy

At **GEPCO**, quality management is central to our organization; all deliveries are rigorously inspected prior to shipment to ensure the highest standards and process integrity. We recognize our responsibility to mitigate our environmental footprint through specific internal protocols:

- **Digital Transformation:** We maintain a paperless workflow, sharing all documentation electronically.
- **Sustainable Logistics:** All product packaging is designed to be compliant with international environmental laws and eco-friendly standards.
- **Waste Management:** Our teams proactively sort and recycle all materials during the delivery and unboxing of merchandise.

Operational Overview

- I. Law Enforcement
 - Shields
 - Helmets
 - Ballistic Vests
 - Riot Control Equipment
 - Special Effect Grenades
 - Grenade Launcher
- II. Protection
 - Demining Equipment
 - CBRN Protection
 - Pyrotechnic defense
 - Naval countermeasure
- III. Surveillance, Detection and Boarder Control solutions
 - Optronics
 - Goniometers
 - Laser rangefinders
 - Night Vision
 - Thermal Imager
 - CCTV
 - VTS and CSS solutions
 - Complete software tailored to the needs of the End User
 - Radar and AIS devices
 - RF Finders
 - Wireless Transmission solutions
 - VHF
 - HF/MF
 - GTA Devices (Ground to Air)
 - GDMSS
 - Satcom solutions
 - Magnetics and Acoustics Sensors
- IV. Navy procurements
 - Underwater Transceivers
 - Inflatable RHIBs
 - Deep Diving Equipment
 - Search and Rescue
- V. Spare Parts & Lubricants
 - Land Rovers
 - Volvo Trucks
 - HOWO Trucks
 - REO 5TON – M813-M17-M18
 - HMMWV
 - Golden Dragon Bus
 - Greases and Lubricants for light and heavy arms
 - Lubricants for vehicles

Operational Successes

Purchase of Search and Rescue Equipment for Lebanese Border Authorities

This contract included the delivery of Maritime S&R Equipment (Collective Life Floats, SOLAS Like Jackets...) and Cardio-Pulmonary Resuscitation and Tactical Emergency Casualty Care Equipment (Defibrillators, CPR Manikins...)

Upon delivery, a training day was followed at the Lebanese Navy base in Jounieh, Lebanon.

This initiative equipped Lebanese authorities with the vital tools necessary for comprehensive search and rescue operations, ensuring they are fully prepared to manage land-based and maritime emergencies with greater precision and speed.

Special Equipment devices for Special Forces in charge of Northern Border Project

In strategic collaboration with the **German Federal Police**, GEPCO facilitated the **Northern Border Security Initiative**, focusing on the comprehensive mapping and surveillance of the Northern Lebanese-Syrian border.

Central to this project was the implementation of a **Local Area Control System (LACS)**, which empowers Special Forces to **detect, identify, classify, and neutralize** a wide range of conventional and unconventional terrestrial threats.

GEPCO's technical scope included the end-to-end architecture of a centralized **Command & Control center**, secure **wireless networks**, and the integration of advanced **sensors, communications, and operational effectors** for rapid tactical response.

Lebanese Navy Seals (Special Forces)

In support of the **Lebanese Navy SEALs**, GEPCO executed a comprehensive procurement project to equip specialized units for high-stakes, critical operations.

The contract involved the delivery of a sophisticated maritime tactical suite, including **Rigid Fast Patrol Boats** and specialized inflatable vessels engineered for **helicopter-slung deployment**.

To ensure peak operational coordination and situational awareness, GEPCO integrated advanced **optronic surveillance arrays**, **underwater communication systems** for synchronized diver maneuvers, and high-specification **deep-diving equipment**.

The specialized payload was further enhanced by **closed-circuit rebreathers** for covert insertion and a range of mission-essential **defense weaponry**, providing the Special Forces with a full-spectrum capability for maritime security and tactical intervention.

Consultancy

GEPCO serves as a strategic consultant for international firms seeking to navigate the public procurement landscape and establish a presence within the Lebanese defense sector. Beyond specialized equipment supply, we are committed to professional capacity building through the coordination of comprehensive seminars and technical training programs for Lebanese military personnel. These initiatives, conducted both domestically and internationally, ensure that operators are proficient in the latest technological advancements and tactical systems. Within the last three years alone, **GEPCO** has facilitated high-level technical delegations to Europe, providing specialized training in advanced radar systems, ballistics, and aviation maintenance for helicopter units.
